AbCRO, Inc. hires Dr. Malgorzata Szerszeniewska to Launch Company's Expansion

Sofia, Bulgaria, June 19, 2007 – AbCRO, Inc., an American-owned contract research organization (CRO) in Eastern Europe, announces the appointment of Dr. Malgorzata Szerszeniewska to the key position of President, AbCRO. In this role, Dr. Szerszeniewska will oversee several of the company's major initiatives including AbCRO's expansion into Poland, Russia and other areas of Central and Eastern Europe. Combined with AbCRO's existing offices in Bulgaria, Romania, Croatia and Serbia, this expansion will give AbCRO comprehensive regulatory and clinical service coverage throughout Central and Eastern Europe. Dr. Szerszeniewska will also take the lead on integrating innovative systems within AbCRO to manage its growth effectively and maintain its standards of quality services combined with excellent patient enrollment results.

Dr. Szerszeniewska is a highly experienced executive with over 13 years of experience in the CRO industry. Prior to joining AbCRO, she served as Director of Clinical Operations, Central and Eastern Europe, at Covance. She also held several other clinical operational positions in that organization. Malgorzata is a Medical Doctor with a degree from the Warsaw Medical Academy and a specialization in Anesthesiology and Intensive Care medicine.

“Dr. Szerszeniewska is an excellent addition to the AbCRO management team,” said Dana A. Leff, CEO of AbCRO. “She has many years of experience in the countries targeted for our expansion. In addition, she has the medical expertise critical to understanding standards of care in our region as they relate to study feasibility and patient enrollment results.”

Christa Pleasants, COO of AbCRO, said “Dr. Szerszeniewska is the right person to continue building a strong operational team at AbCRO as we expand. We are committed to our performance model of the last seven years. She understands the systems necessary to ensure steady growth.”

About AbCRO, Inc. (www.abcro.com)

AbCRO is an American-owned, women-owned contract research organization in Central and Eastern Europe which provides Phase II to Phase IV clinical study services to global pharmaceutical, contract research and biotechnology companies. AbCRO has offices in Bulgaria, Romania, Croatia, Serbia and Poland, which are the foundation for comprehensive regional coverage. With ready-access to a broad range of patient populations, AbCRO represents a new approach to patient recruitment for clinical research. As a niche provider with a geographic focus, AbCRO offers financial advantages that offset the escalating costs of clinical research.
